IT HUNT / ENGINEERING & PRODUCT

Two-Month Project\nChange History

A verified record of repository changes and delivery themes

REPORTING WINDOW

30 August - 30 October 2026

218 commits reachable from the current repository HEAD

Prepared 30 October 2026 | Source: Git repository history

Executive summary

This report covers 218 commits dated 2026-08-30 through 2026-10-30, inclusive. The ledger records each commit hash, date and subject, grouped by the best-fit workstream derived from commit text and changed file paths.

It is intended as a management-friendly overview and an auditable index. A commit title is a concise history label, not a complete specification of behavior; inspect the corresponding commit diff when implementation detail is required.

Change themes

User experience and accessibility	**50**
Education and portal workflows	**43**
Authentication and administration	**85**
Email and notifications	**0**
Platform, reliability and maintenance	**40**

Repository activity

Commits were recorded on 26 distinct calendar dates. The busiest dates by commit count were: 2026-09-11 (23); 2026-10-30 (19); 2026-10-27 (18); 2026-09-24 (15); 2026-09-14 (14).

How to read this report

The categorized summary is heuristic and based on commit subjects plus changed paths. The complete ledger that follows retains the repository's original short hashes and commit subjects. Times are not displayed because the source report uses calendar dates as recorded in Git.

Complete commit ledger

All 218 commits in the reporting window, in reverse chronological order.

Authentication and administration

2026-10-30 63e2819 fix(admissions): declare password variable and provide resilient Vercel JWT fallback
2026-10-30 bcc4fed #comment Set the Authenticxaton issue

2026-09-17 adef9cb nhj

Authentication and administration

2026-09-17 73fb47d #comment Added Functionality

2026-09-17 3017537 style(theme): set solid black text (#000000) across all components and sections in light mode

User experience and accessibility

2026-09-17 be25993 fix(theme): ensure 100% text visibility and high contrast across all sections and footer in light mode

Authentication and administration

2026-09-17 c55125b feat(superadmin): enhance dark and light theme visibility across all panels/modals and make fully responsive

2026-09-17 c24f35e feat(superadmin): redesign superadmin console with enterprise app shell, collapsible sidebar, executive overview dashboard, and clean minimalist aesthetic

2026-09-17 ff0fbb5 fix(security): remove hardcoded email app passwords, personal emails, and database credentials from codebase

2026-09-17 db0b813 fix(auth): initialize admin session synchronously and synchronize auth storage to keep footer hidden for superadmin

2026-09-17 2150270 fix(footer): hide footer completely whenever logged in as superadmin or on login/superadmin tabs

2026-09-17 0e45877 fix(ui): remove footer for admin login and remove admin login links from public footer

2026-09-17 c87b113 feat(superadmin): add complete student dashboard control center with tab switches, notice banner, metrics & account status

Education and portal workflows

2026-09-16 5c84d46 feat(student-portal): add verified certificates & QR verification tab with live scanner and navbar links

Authentication and administration

2026-09-16 0e798fc feat(certificates): add scannable QR codes with live verification portal & update mailer sender headers

Education and portal workflows

2026-09-16 bb678b4 NIELIT emails sent via Gmail SMTP (PDF attached: tr

2026-09-16 827c194 #comment Generated PDF bug fixed

2026-09-16 1d57fbc #commit Update the ermisl

Authentication and administration

2026-09-16 8e08577 feat: add course & experience certificate generation for SuperAdmin and full project responsiveness

Education and portal workflows

2026-09-16 97b202f #comment Mail Pdf Body bug resolved.
2026-09-16 4f5d874 fix(pdf): adjust Page 3 & 4 fee table column widths and text fitting
2026-09-16 c5a6cc4 Create test-nielit-email.js
2026-09-16 db37d57 fix(mail): configure Gmail SMTP with sanitized credentials and multi-admin dispatch
2026-09-16 d7de6dd feat: send 4-page NIELIT PDF via email on project submission

Platform, reliability and maintenance

2026-09-16 e73581b fix: resolve Vercel cold-start MongoDB 500 error

Education and portal workflows

2026-09-16 68c03b4 fix: remove extra closing brace in apiClient.js fetchAdmissionsFromBackend

Platform, reliability and maintenance

2026-09-14 37b35d2 Update admin.routes.js
2026-09-14 fa1afbf docs: update API documentation with live Atlas endpoints and PDF directory

User experience and accessibility

2026-09-14 bd0d567 test: add end-to-end database scenario and live HTTP test suites

Authentication and administration

2026-09-14 93a5e7c fix(db): resolve password double-hashing & contact date casting; add scenario & HTTP test suites
2026-09-14 f82e913 refactor(db): enforce 100% direct MongoDB Atlas Cloud persistence and remove all local storage/memory mocks
2026-09-14 55c7ec0 fix(auth): add fallback default admin and memory store seeding

Platform, reliability and maintenance

2026-09-14 b0846c8 fix(db): ensure correct Atlas cluster URI fallback and connection timeout on Vercel
2026-09-14 9d1a3d2 chore: add connection diagnostics to /api/health
2026-09-14 00c39f2 fix(serverless): implement global._mongooseConn caching and bufferCommands:false for Vercel
2026-09-14 5c6c99e feat(db): enable real-time dual-sync between Atlas and Local MongoDB and add db:clean
2026-09-14 99e2c77 fix(dbAdapter): add id, code, and slug to alternative lookup queries

Authentication and administration

2026-09-14 3865994 feat(database): connect courses, admissions, and all collections to MongoDB with live sync and admin management

Platform, reliability and maintenance

2026-09-14 b904b74 feat(db): add relational views to setup-both-dbs.js
2026-09-14 67071d3 feat(db): add dual MongoDB setup and Compass sync script
2026-09-11 b3e20fa feat(server): expose lastError and enable dynamic reconnection for serverless
2026-09-11 4c5261f feat(db): connect MongoDB Atlas cluster as primary cloud database

Education and portal workflows

2026-09-11 6d67765 feat(db): enhance schema validation fallbacks and admission user synchronization

Authentication and administration

2026-09-11 a106d1a fix(superadmin): unify student registrations display, add live polling, pending alert banner, and instant refresh
2026-09-11 3d4418f feat(superadmin): add admission confirmation, auto credentials generation and student login management

Platform, reliability and maintenance

2026-09-11 4567c32 fix(api): add missing server dependencies for Vercel deployment and optimize serverless handler
2026-09-11 031ed32 Complete Removal of Firebase & 100% MongoDB Setup Implementation Plan.

Authentication and administration

2026-09-11 11ec351 refactor: transition to pure MongoDB MERN architecture and remove Firebase dependencies
2026-09-11 f2954ed #comment Set the apis
2026-09-11 d69d4a1 feat(admissions): link student registration with admissions record and IST timestamps

Platform, reliability and maintenance

2026-09-11 da7524d feat(api): add GET /api/admin/users endpoint

Education and portal workflows

2026-09-11 f08d4af feat(db): full schema normalization, direct REST routes, and db:test verification tool
2026-09-11 e1ec35c fix(vercel): add /courses routing alias
2026-09-11 a6deeef feat(db): register and seed all 14 data model types in database ithunt

Platform, reliability and maintenance

2026-09-11 12e925a feat(vercel): use explicit Vercel routes with path param forwarding to Express serverless function
2026-09-11 6e5cb24 fix(vercel): map rewrites directly to /api serverless handler and restore matched path

Education and portal workflows

2026-09-11 143e364 fix(vercel): configure catch-all serverless function and clean rewrites for /students and API routes

Platform, reliability and maintenance

2026-09-11 f19109b feat: configure Vercel Serverless Function and API rewrites

Scope and methodology

Reporting window: 2026-08-30 00:00:00 through 2026-10-30 23:59:59, inclusive, using Git's commit date filters.

Source: commits reachable from the current local HEAD at report-generation time. The report excludes uncommitted changes, unmerged branches, external issue discussions, and work that did not result in a commit in this repository.

The workstream classification is generated from each commit subject and the paths changed in that commit. A commit may touch multiple concerns; each entry is assigned one primary category for readability. Category labels are not formal release or quality assessments.

To regenerate this report from the repository root, run `npm run docs:pdf`. The PDF is written to `docs/IT_HUNT_Changes_August-October_2026.pdf`.
